

FORCE PRESSURE CONTROL EXPANDS INTO ROCKIES AND MID-CONTINENT WITH NEW FACILITIES

SEGUIN, TX – October 2024 – Force Pressure Control has expanded its operations into the Rockies and Mid-Continent regions with the opening of three new full-service facilities in Williston, North Dakota; Casper, Wyoming; and Yukon, Oklahoma.

These facilities provide operators in the Bakken, Niobrara, and Woodford shale plays with access to Force's complete service offering, including master valves, greaseless and conventional frac stacks, zipper manifolds, drillout flowback, mixing plant and chemicals, well testing, blow-out preventers, and ancillary services.

"Expanding into the Rockies and Mid-Continent reflects our growth strategy and commitment to meeting operators where they work," said Jacob Startz, Chief Executive Officer. "These facilities strengthen our ability to deliver dependable performance, safety, and customer service across multiple basins."

About Force Pressure Control

Founded in 2019, Force Pressure Control is a leading provider of frac and flowback rental tools, well control solutions, and proprietary API-certified equipment for the energy industry. Headquartered in Seguin, Texas, Force has rapidly expanded its footprint across the Permian, Eagle Ford, Haynesville, Rockies, and Mid-Continent, supported by state-of-the-art facilities and highly trained personnel.

The company designs, manufactures, and services proprietary valve and choke technologies under API 6A and API Q1 standards, including patented innovations that deliver enhanced safety, reliability, and efficiency in extreme environments.
